DESCRIPTORS College Students, *Directories, Higher Education, *International Programs, *Study Abroad
IDENTIFIERS *New England

ABSTRACT

This directory attempts to provide students, faculty and administrators with comparative information on study abroad programs conducted by colleges and universities in New England. Section I, the introduction, deals with the objectives and scope of the report. Section II presents: (1) a general survey of study abroad programs for U.S. participants, including the extent of the programs, an evaluation of the programs, and suggestions for future improvements; (2) a discussion of undergraduate study abroad programs, including some of the dangers involved, and recommendations for improvement, such as the establishment of an advisory service on study abroad, and a moratorium on new study abroad programs, until all possibilities for cooperating with an established program have been examined and exhausted; (3) a brief review of attempts by educators to set standards for foreign study programs; and (4) an examination of the university's responsibility in international educational exchange. Part III presents information on the study abroad programs offered by New England colleges and universities. (AF)

IV. DATA SHEET FOR ADDITIONAL INFORMATION 141

I - INTRODUCTION

This directory is an experimental and interim inventory of one element of international education in the New England area. It represents an attempt to provide students, faculty and university administrators with comparative information on study abroad programs conducted by colleges and universities in the New England Area.

With a continually growing interest in intercultural studies, foreign travel and world affairs, more and more students are experiencing opportunities for international education. This type of education is seen, and demanded, as essential growth in intellectual awareness. Some of this educational endeavor is regraded as valuable; some of it is seen by critics as a wasteful exercise.

Undergraduates have quickly realized the possibilities for foreign travel and study abroad. Some have already engaged in overseas study through high school programs. Most undergraduates, however, will not have had the opportunity to engage in foreign study or travel by the time they graduate.

The aim of foreign education is frequently cited as general understanding rather than specialized guided education. Many argue that participants expand and understand their own cultures more through an exposure to other cultures. A testing in foreign languages is seen as an achievement of cultural value, while the growth in knowledge and appreciation of viewpoints of other countries is considered a way of improving the functioning of the United States in political, economic, and social affairs abroad.

Hopefully, there is an increased awareness abroad of the special features of the American culture.

Many programs summarized in this directory claim that the objective is the furthering of the student's personal development or intellectual maturity. If this is the main reason for the foreign experience, questions can be raised as to whether experience in self-development and self-reliance is best gained in a foreign environment. Foreign studies of graduate programs abroad are usually specialized and aim at specific academic, professional, or vocational objectives. Similar objectives are sometimes included in undergraduate programs, particularly for language majors.

The concept of the Junior Year Abroad Program has been closely examined in recent years. This directory includes evaluations and critical comments on the progress and future of these study programs. The major difficulty is that undergraduates cannot always follow courses as regular students in overseas universities. Attempts to take the American campus abroad reduce the program's value as an intercultural experience and are frequently viewed abroad as unsubtle efforts to Americanize the world. Integrating the overseas program with the home campus curriculum has been extremely difficult to many programs.

The programs identified in the directory are study abroad programs for any undergraduate period of education, including summers, where credit transfer is possible. The study is limited to the institutions of higher learning in the New England region, although it is realized that many overseas study opportunities exist and are available to New England students in universities and colleges outside of the New England region. The directory provides summary information on the study

abroad programs, with data on the extent of student eligibility, the major content of the program, the aims of the curriculum, the costs of participation, and its duration.

One purpose of the directory is to provide comparative information to students interested in undertaking study aboard programs. It is hoped that the information will encourage students to select their programs wisely and with greater eventual benefits.

The directory also aims at providing administrative officers of educational institutions with data on programs conducted by similar institutions in the region. In this way, it is hoped that the information will provide advice and guidance for the formation and rational development of international programs generally, in the New England region. It is possible that many programs have been duplicated by competitive endeavors and have become excessively expensive in administrative cost because of this factor. There appears to be growing need for the careful planning of future overseas study programs since funds for this purpose have become increasingly scarce, and interest in such activities has been replaced by black studies, social studies, and environmental problems of the American economy and society.

In an effort to keep information of this type as current as possible, a questionnaire is appended to this directory for the use of institutions who revise their programs in 1970-71 or subsequent years, and for completion by institutions which unfortunately were omitted in this survey.

No claim is made that the data contained in the directory is complete or accurate in any precise way. The data has been obtained from the best possible sources and, wherever possible, from the directors of the programs themselves. The compilers of this directory would welcome comments, suggestions, and data on existing and planned abroad programs conducted by the universities and colleges of the New England region.

II. COMMENTARIES ON
STUDY ABROAD PROGRAMS

A GENERAL SURVEY OF STUDY ABROAD PROGRAMS FOR U.S. PARTICIPANTS

Introduction

Study abroad programs are greatly varied in nature, availability,
¹
 and in content. Organized as study programs, their intention is
 primarily educational. If we define education as the process of con-
 fronting an individual with a new experience, all travel is education.
 Yet study abroad in the strict sense is quite different; it is neither
²
 travel nor residence abroad. According to Freeman it is a

"genuine and serious intellectual effort, with systematic and
 planned progress toward a body of knowledge with a large measure of
 appropriate reading and discussion under professional guidance, look-
 ing to the formulation of wise judgments on the basis of adequate
 information and finally a rigorous control and validation of the
 results by examinations and reports, of the same level and quality as
 would be required of the same student at the home institution."

Under this definition, study abroad is not to be equated with the
 "exchange of persons," "study tours" either for the summer or for one
 or two semesters even if academic credit is "available" toward a
 degree. A person abroad is not necessarily a foreigner, and conversely,
 an "alien" is not necessarily away from his own country. UNESCO iden-
 tifies the foreign student as a person temporarily studying in the
 tertiary levels of education at an institution in a country other than

1. See in particular UNESCO, Study Abroad, 1969/70.

2. Stephen A. Freeman, "Undergraduate Study Abroad," Undergraduate Study Abroad, U. S. College Sponsored Programs, New Edition, IIE, 1967, p. 12.

the one in which he has his permanent residence.

The Extent of the Programs

To begin with, there are no reliable statistical data of the strength of the study abroad programs. This situation applies especially before the 1950's; most of the data now available are based on the figures derived from the undergraduate programs sponsored under cooperative arrangements.

Until 1950 not more than six or seven cooperative programs existed and most of these were the "Junior Year Abroad" type. It is also notable that most state colleges had not entered this field by this date. It has been estimated that in the entire period from 1919 to 1955, less than 2000 undergraduates had studied overseas both under cooperative programs or otherwise. By the middle of the fifties the boom on study abroad took hold. In the year 1956, the estimated number of undergraduates studying abroad was more than 1000. Of these, more than 600³ students were enrolled under about 22 cooperative programs.

By 1959 - 60, the number of cooperative programs themselves doubled for "it was in the sixties that the foreign study movement spread all over the world."⁴ The enrolled student population became more than 1500 students under the cooperative programs alone. In 1962-63, these cooperative programs had again doubled, rising to 103 and enrolling more than 3000 students.

In this same year, the total student population who went abroad went abroad under "student visa" was more than 70,000. Of these,

3. Undergraduate Study Abroad, op. cit., p. 5.

4. Irwin Abrahms, "The Evolution of Undergraduate Study Programs Abroad." Exchange, Spring, 1968, p. 13.

almost 14,000 were "actively registered" in foreign universities. By 1966, this number became nearly 25,000 and by the end of 1967 the number of "actively registered" students became as high as 36,000. The total number of American students abroad, however, is more than 300,000; more than twice as many as the number ten years ago.⁵

According to the data available in the Immigration Office, more than 363,400 Americans between 15 to 24 years of age received passports in the year 1967-68, of whom more than 292,000 were students actively engaged in educational pursuits. More than 150 cooperative study programs are now in operation.⁶

Evaluation

A scientific evaluation of the study abroad programs cannot be properly made due to lack of properly defined criteria which are generally acceptable. Is cost-benefit analysis a good criteria? Can the social costs be measured in quantitative terms? These are some of the measurement problems. As such, many social scientists take different views on the criteria of evaluation.⁷ Durnall, for instance, has utilized six of the fifteen principles developed at a conference on study abroad programs held at Mount Holyoke College in 1960 as means of evaluating programs. These principles cannot however be put into quantitative terms.⁸ Ruth Churchill concentrates heavily on the changing pattern

8. Ruth Churchill, "The Student Abroad," Antioch Review Vol. XVIII (1958), pp. 447 - 454.

of the student's outlook as an acceptable criterion. Similar opinion⁹ has been expressed by Swell and Davidsen. Less scientific expressions have also been made both by writers and statesmen. For instance, Thomas Jefferson was convinced that an "American coming to Europe for education, loses in his knowledge, in his health and in his habits." George Washington, on the other hand, declared that "a serious danger is encountered by sending abroad among other political systems those¹⁰ who have not well learned the value of their own."

In this summary evaluation, let us take the objectives as the basis of the criteria. If the objectives have been successfully performed, we can assume that the programs are a success.

Some of the objectives of the study abroad programs as listed by the IIE are as follows:

1. The most commonly stated objective for undergraduate study is to improve the realm of general education. The aim is the humanizing and broadening result of contact with different portions of the world scene and a different cultural environment. Furthermore, it seeks to mature the student's "social personality."

2. The second objective is the mastery of foreign languages and the appreciation of literature, civilization and cultures of the foreign country.

3. The third objective is the specialized study of some subject matter in the student's academic programs, whether in his major field

9. William H. Swell and Olief M. Davidsen, "The Adjustment of Scandinavian Students, " Journal of Social Issues, Vol. XII, No. I. (1956), pp. 9 - 19.

10. William W. Brickman, "Introduction to the History of International Relations in Higher Education"; New York, 1960, pp. 138 - 40.

or in some other field which interests him.

4. The fourth objective is to build up a favorable international understanding. It is clearly valuable for an American undergraduate to become aware of cultural differences through personal experience and to gain a sympathetic understanding and appreciation of the people and civilization of another country.¹¹

It is evident from past experience that most of the students have been successful in achieving most of these objectives in spite of "cultural shocks." In the task of achieving the educational target, the students do suffer serious problems which are no doubt beyond the control of the student. Some of these problems are due to

1. the divergent nature of the foreign universities. There are wide dissimilarities in the curricula between most foreign universities and those of the U.S.

2. lack of credit system in foreign universities. Coupled with this, there is no uniform standard in degrees. The American student, therefore, finds it difficult to adjust to these variations.

3. In most of the foreign universities, the different faculties are highly independent of each other. Students are usually required to take their work in a single faculty and are not permitted to combine a program of courses in several faculties.

4. The language problem also plays a prominent role in inhibiting the American student in achieving his educational goal. What is important in this field is the knowledge in idiomatic and proverbial language that is usually required. It is extremely difficult for any student to grasp these in a short time.

11. Undergraduate Study Abroad, op. cit., p. 13.

These educational problems undoubtedly inhibit the achievement of educational objectives of the American student. Yet proper planning at both ends could eliminate these weaknesses to a very great extent.

Even in the environmental change the American student faced difficulties of adaptation and assimilation. However, because most of the foreign universities have already provided numerous solutions, the students in the future will not face as many difficulties. For instance, in a French University, an American student was expected to produce for extramural credit a "document indicating immersion in the foreign culture in some more personal way than through class room and library study."¹² Oldt holds the view that this method has been very successful in achieving the goal of environmental knowledge.

Future Improvements

The newer programs of study abroad tend to be more broadly conceived than the more traditional junior year abroad which was designed largely for the language major: Examinations of existing programs suggest the following guidelines for future development:

1. New programs should be geared if possible to similar programs in the same field of studies and in domestic insitutions with which the institution could cooperate.
2. Study abroad should be conceived as a continuation of education under carefully sturctured and planned conditions, with the same attention to the quality of attainment abroad as at home.

12. Esther A. Oldt, "Antioch Education Abroad, The Past Decade," Exchange, Winter 1968, p. 23.

13. Durnall, op. cit.

3. Admissions standards should include intellectual capacity, motivation, character, and potential for social adjustment, and adequate working knowledge of the language of instruction in the foreign country.

4. Extremely well qualified directors of programs should be engaged and very limited use should be made of U.S. faculty.

5. Continuing evaluation should be undertaken to maintain academic excellence; regional agencies should be involved in developing evaluative criteria for visitation committees.

UNDERGRADUATE STUDY ABROAD

In 1964 the Consultative Service on U.S. Undergraduate Study Abroad of the Institute of International Education published a directory of study abroad programs. The publication included an analysis of undergraduate study abroad by Stephen A. Freeman, who serves as consultant to the Consultative Service. In a second, revised edition of the directory, published in 1967, Mr. Freeman contributed an updated analysis. Mr. Freeman is vice president emeritus of Middlebury College, Middlebury, Vt., and director of its language schools.

The great majority of the liberal arts colleges in the United States now organize some sort of study-travel program of their own, or approve the participation of their students in some other program. Until 1950, only a half dozen junior year abroad programs existed. The number rose to 22 in 1956. There were 103 college-sponsored programs conducted during the academic year 1962-63. An increase of nearly 100 percent took place in the next 3 years. Summer programs of resident study abroad have increased from 63 in 1962 to 97 in 1965. Educators in general now seem to recognize that it is educational and humanizing for a student to know from immediate personal experience that people in other lands think other thoughts and express them differently and for him to become subjectively aware of cultural differences.

Freeman, Stephen A., Undergraduate Study Abroad, second edition (Institute of International Education, 1967). Reprint with permission from the Institute of International Education.

No less extraordinary has been the response of our students in their desire to go abroad, to study, to travel, and to have a first-hand, direct contact with the world beyond our shores. No one really knows how many American students go abroad each year, but well over 100,000 passports were issued last year to "students." It is now the vogue and the natural ambition for American undergraduates and even for high school students to cross an ocean or a frontier for a period of adventure and study...

The dramatic growth of this movement proves the realization of a need and its great potential for good. The proper objectives are educational in the deepest sense. There has been a distinct improvement recently in the quality of many of the study programs. Their administrators at home and abroad have gained experience rapidly. They have profited from the criticism made in various reports on study abroad, from increased cooperation with the host universities, and from the pressure of academic opinion at home. The selection of students has improved. The majority of genuine study programs which have now had 3 or 4 years of continuous experience seem to be well managed, and well received in the foreign country. The results in the students also appear to be increasingly successful, although objective evaluation is difficult.

Danger

Like all revolutions, however, there are excesses in this one; and some of its uncontrolled activities point to real dangers. Programs and "travel-study" plans are now offered at all levels, from secondary school up, and with all possible types and combinations of

arrangements. Teachers from grade school to graduate school are deluged with colorful folders. There are programs sponsored by small colleges and great universities, the private schools, by religious organizations, education associations, hostel groups, youth groups, voluntary service associations, commercial travel agencies, "nonprofit" or otherwise, and many more. All these programs differ widely in objectives, in standards of instruction, in requirements, and in effective academic and social supervision. Some colleges consider a foreign study program a necessary advertising gimmick in the competition for students, or a matter of prestige. Some see in a foreign program a way to increase their dormitory facilities by dumping a percentage of their students on an already overcrowded foreign university.

The failure of many institutions to examine their objectives and evaluate their results critically and realistically, their ignorance of the foreign scene and of the foreign educational system, the pressure of student demands and sometimes of faculty self-interest, the inadequacy of their personnel and financial resources, the duplication of effort, the shoddiness of some plans, the mediocrity of many of the students and some of the directors who are sent abroad - these and many other reasons make it imperative for college administrators, advisers, parents, and students to examine any program with the utmost caution.

Serious resistance is beginning to develop in Europe to the acceptance of large numbers of new American study abroad programs. Europeans are still polite and hospitable, but at some of the universities, we are beginning to wear out our welcome. The great European universities are far more overcrowded than anything we know in this country. It is almost impossible even to get standing room at a major Sorbonne lecture

unless you go an hour early. It is becoming common procedure in Paris for a student to remain in his home and listen to university lectures broadcast on the radio. European students frequently demonstrate against an intolerable situation of administrative confusion due to overcrowding. There is a critical shortage of professors, classrooms, seats in the libraries, and study space of any kind.

Housing for students is in a desperate situation. In some university cities many of the native students live in hovels; others return home and give up a university career for lack of a place to sleep. Small wonder that some highly placed officials in the German university system are saying: "We want no more American undergraduate programs. They send us a mixture of good and mediocre students, many of them poorly prepared even in the German language, and expect special privileges of all sorts. If students come as individuals and pass our language proficiency tests, we are required by law to accept them as individuals; but we are taking no more programs."

In Paris, the chief purpose of the Service d'Orientation in the fine new Centre Albert Chatelet is to prevent ill-prepared foreign (not necessarily American) students from clogging the facilities of the various Facultes. Qualification tests in French for the equivalence of the baccalaureat have been set up like the German plan. So far the requirement is not being enforced, but some official move is not far distant. Even the larger provincial universities such as Bordeaux are beginning to set limits on foreign-study programs. Many universities are organizing their own courses for foreigners under their own control and will not admit autonomous outside groups...

The Problem

Both urgent and practical is the plea from high school and college teachers under pressure to advise their students, and from the parents and the students themselves: "How can we distinguish a good plan from one less good or from one which is downright bad? Is there no official evaluation or accredited list which can guide us?"

Realistically, it would be unwise, misleading, and perhaps even dangerous for IIE or any other organization to attempt an official evaluation, or accreditation of the hundreds of plans and programs under which American students are now going abroad. The chief reason is that the quality of a program does not necessarily remain the same year after year. The administration at home, the director of the program abroad, the instructing staff, the composition of the student enrollment, and the circumstances of the situation abroad - all these inevitably change from year to year and have a marked effect upon the quality of the program.

A list of approved programs would also be subject to regrettable omissions, the exclusion of good programs, either through clerical error, or through the lack of needed information. Omission of a program from an approved list would be understood as blacklisting, though it might be unintentional. On the other hand, the publication of a list of unapproved programs and plans, which could be interpreted as blacklisting, would be subject to similar errors. Finally it should be added that no program is perfect, and no program is totally bad. A well-prepared, mature, and serious student will be able to get something from the worst plan, in spite of its faults, and through his own efforts. On the other hand, the very best plan will never

satisfy or profit the wrong student...

Recommendations

Advisory Service. This report recommends the creation in each college or university of an advisory service on study abroad.

The tens of thousands of American students interested in a period of study abroad ask many questions, although usually quite unaware of the seriousness and complexity of the problems involved. To what country and to what university should the student go? Is there an American study program operating there, and would it admit him? Or should he go on his own and plan on getting in somewhere? How can he construct and enroll in the course of study which he wishes? How can he get academic credits for it and have them count toward his American degree? What good are the certificates and diplomas that the foreign university offers? At what time in his undergraduate career should he go and how long should he stay? How much will it cost? And how can he help defray the expenses? Where can he get information and advice?

Every American institution which organizes a program of undergraduate study abroad pledges its authority and assumes the responsibility for its success. Yet the institution which does not have its own program also has a serious responsibility. Educators and students now believe that a foreign study experience is a valuable, even necessary, part of a liberal education and of a student's preparation for his career in a global society. Every institution must therefore adopt and implement a clear policy on this important matter...

The first and essential step is for each college to create an official advisory service on study abroad. It should designate an adviser to students on study abroad, a man with authority in the administration and with effective influence among the faculty. He must have an extensive knowledge of foreign institutions and educational systems, complete familiarity with American education and with the home college curriculum, the ability to deal firmly but sympathetically with students, and to hold up high standards for them. His office should have the full cooperation of all administrative and instructional departments of the college and he should coordinate his procedures carefully with all of them. His office should be in a central place, equipped with the multitude of information and reference materials necessary for his own use and for consultation by students. Every student will be required to consult the adviser before going abroad for any study for which credit is sought. The creation of such a post in every college in the country is of the utmost urgency.

This adviser will aid the student in defining his objective, making sure that it is well considered, worthy, realistic, and properly related to his whole curriculum. He will help him to choose between the different types of programs available, and to decide where, in what country and university, his objective can best be achieved. The adviser will have investigated carefully certain programs of other colleges which he can recommend, and in which he has arranged for qualified students to be accepted. The adviser will counsel the student about all aspects of preparation for foreign study, the requirements in subject matter and in the knowledge of the

foreign language. He will give the student, or see that the student receives, advice and guidance about practical matters such as transportation, clothing, arrangements for living with families, the social code, manners and morals abroad, costs of travel, and the handling of his finances. Women students need especially careful briefing. The adviser will also create positive personal contacts for the students in the foreign country. He will be a close liaison with the director of the program in which the student enrolls. The adviser will be the official academic anchor at home, and the coordinator of the student's reentry and reorientation after he returns.

This is the responsibility of the American college or university for every one of its students whom it sends abroad, or permits to go abroad for a study program to count toward a degree. This responsibility is not now being properly assumed by a majority of the colleges in the United States. We are therefore flashing a danger signal, a warning to the college which is not discharging its responsibility, or to any American student who does not find available to him in his college this advice and guidance.

This total responsibility of a college for its student who is studying abroad for degree credit is the basic reason for our frank recommendation against a college's participation in the commercially or privately organized study programs which arrange travel, instruction, living, and promise or imply academic credit. We do not refer to such reputable organizations as the Experiment in International Living or the Council on Student Travel, which do not arrange instructions or credits. But there are scores of privately administered programs, institutes, and centers which enroll students for study abroad; many of

them have a right to the label "educational nonprofit;" some claim to be college-sponsored or affiliated; most of them have college professors and officials on their boards of directors; all imply the award of degree credits, perhaps conditional upon prior arrangement with the student's college. Some of them offer a good program, well supervised and directed; some are good in one country and poor in another; some are definitely mediocre. Some will accept enrollment from all comers, from high school students to middle-aged housewives, with no suggestion of selectivity except the payment of a fee. Most of them are primarily concerned with increasing their enrollment, because they make their money or balance their nonprofit budgets on the quantity, not the quality, of their operations. Some of them answer the legitimate needs of people who cannot secure admission to a college-sponsored undergraduate or graduate program. This is therefore not a sweeping condemnation; we repeat that generalizations are sometimes unfair in the particular.

Our recommendation is simply this: if a college or university which is considering affiliating with a commercial or privately directed program recognizes its duty to take the time and has the personnel qualified to investigate thoroughly, evaluate continuously, and sanction by its own academic authority the instruction and credits provided by such a private program not under its direct control, it would be just as easy and much safer to organize its own program, or at least to cooperate with another accredited college.

Cooperation. We conclude with a final recommendation which will help to solve some of the problems we have been discussing. We call for a moratorium to permit cooperative planning. No new program of

study abroad should be established by any college or university until it has investigated all possibilities of associating itself with an existing college-sponsored program of high quality and similar objectives. If even a majority of the 1,300 accredited 4-year liberal arts colleges in this country should attempt to set up programs of study abroad, the resulting chaos would be unimaginable. Long before that, the European educational system would have closed its doors to all American undergraduates

Cooperation between American colleges is the only answer. It is already in effect in many colleges and showing valuable results. The Great Lakes Colleges Association, after careful joint investigation, has developed programs in Latin America and in Beirut, and cooperates with Antioch and Earlham in Japan. The Indiana colleges have joint programs in Great Britain and Mexico. Other examples of cooperation are the Associated Colleges of the Midwest, the California State colleges, the Minnesota colleges, the New York State colleges, and the Pennsylvania State colleges...

A program of study abroad which will bring honor to the home institution is difficult to organize and operate. Small colleges may not have enough qualified students and program directors every year to support the desirable continuity. No college should consider a project of study abroad unless and until it has carefully weighed its own resources in faculty, students, and finances. Duplication of effort, the resultant waste of time and money, and unnecessary administrative burdens can be avoided when several institutions of similar character and objectives pool their resources, their faculties, and their students in a cooperative effort. Such cooperation is also

becoming mandatory in order to avoid the harmful competition which is now going on abroad for location, instructional staff, classrooms, housing, and other educational resources. The universities of Europe welcome this merging of American programs.

The American undergraduate will continue to go abroad in ever increasing numbers, to travel, to study, to learn. It is the duty of his college so to inform, select, prepare, guide, and supervise him that the resulting experience will be to his maximum intellectual and personal profit.

EDUCATORS CONFER TO SET STANDARDS FOR FOREIGN STUDY PROGRAMS

With the proliferation in recent years of American foreign study programs in Europe, concerned educators have begun to set standards to ensure the academic quality of programs and thus protect both the American and European academic communities.

The Standing Committee of the Directors' Conference of American Study Programs in Germany met in Bonn in 1968 to present a listing of those American academic programs accredited by German universities. The committee has thus established a precedent in defining and reporting relationships between German universities and academic programs for study in Germany.

Attending the meeting were representatives of the Conference of the Presidents of the West German Universities, the Conference of the Ministers of Education, other educational bodies, the German universities, and the American programs.

Questions treated at the three-day meeting included: is enough consideration given to the bearing of university reform on study undertaken by foreigners; will the introduction of a general quota allow foreigners to study in Germany at all; will a considerable rise of fees for foreigners be necessary -- as, for instance, in England; will the changes in the course of study within the philosophical faculties considerably complicate

Extracts from Argonaut, Vol. 3, No. 3, June 1969

the integration of American undergraduates into the German university system.

At a conference of directors of American programs in Spain held in Tenerife a new committee was formed. It has goals similar to those of the German committee. The directors proposed the establishment of a regional Conference Board of American Programs in Spain as overseers of the evaluation and accreditation of American foreign study programs.

The 6-member agenda committee considered four criteria for accreditation of such programs. The committee further expressed the hope that the final criteria will be applicable not only to Spain but to other countries in which there are American programs.

The memorandum submitted by the committee states, "We believe... the academic year abroad is not intended to provide a year of research or a grand tour of principal sites for a resident director, or a vacation and pleasant diversion for restless students. We urge, instead, that the year abroad is a unique opportunity for the student to continue his academic work at a substantial university level, and that anything less is as unacceptable in Spain as it is at home."

The question of how to deal with foreign students in European universities, considered by the Standing Committee in Germany, was also discussed at the recent Boston conference of the National Association for Foreign Student Affairs. Topic of one of the NAFSA meetings was "Developing Reciprocity in Exchanges between U. S. and European Universities." It was pointed out that since the development of American interest in foreign study, American programs have rarely compensated the European universities for many services extended American students. With the increased pressure among European students

for a university education, the lack of room is now prompting many European universities to reassess the situation concerning American students.

The British ministry of education has already decided that a sum is to be paid for every foreign student attending a British university. Some American colleges and universities with foreign study programs have escaped this assessment by working out alternative compensatory arrangements. Queens College of the City University of New York, for example, has a program for its students at the University of Leeds, whose administration is willing to pay the ministry for each Queens student in attendance. In return, Queens agrees to place British students in its programs in France.

Other means of reciprocity considered feasible by those at the NAFSA conference were: 1) arranging for European professors to spend a year at an American educational institution; 2) contributing funds to the European universities; and 3) establishing an exchange program for graduate students.

Whatever solutions prove viable for a particular educational institution to guarantee its students a foreign study opportunity, each of them is finally being forced by the European universities themselves to recognize the need for action.

THE UNIVERSITY'S RESPONSIBILITY IN INTERNATIONAL EDUCATIONAL EXCHANGE

The traditional role of universities has, until recently, been conceived of as being principally two-fold: first, teaching, and secondly, research. Research, because of its published results, has transcended national boundaries, but teaching most generally has not. By such teaching we mean especially that students in a given class do not adequately represent peoples from over the world and that teachers do not have sufficient personal experience drawn from sojourns in other countries. In this century, it is becoming quite clear that a national frame of reference for either teaching or research is too narrow a view of the functions and purposes of a university. Increasingly, especially after the Second World War, universities have become concerned with another dimension, the international one. They are becoming involved in this dimension, however, more as a reaction to external and indirect pressures than as a result of a premeditated and consciously formulated plan.

A university in these times can only be considered a true university if its students and faculty are aware of the complex and manifold nature of the world and its peoples. The universities must, therefore, accept

Extracts from a Report of the Meeting of the Continuation Committee for Educational Exchange, Bellagio, Italy December, 1966. From this meeting was formed an International Committee for the Study of Educational Exchange. This group is charged with initiating, sponsoring and encouraging careful study of problems of educational exchange. It was recognized that universities should introduce major international elements into the education of all students and that they should become more involved in the planning of exchange programs.

and welcome a commitment to this international frame of reference, and they must do so consciously as a means of realizing their fullest potential. They must accept the view that their students and faculty are not limited only to their country or region but belong to the whole world. It is only when they accept this international commitment with all of its implications that they can achieve the third and perhaps most important role of a university, which is the ability to serve the world-wide community.

This international dimension, consciously fostered and purposefully executed, involves the exchange of students and faculty members between universities in different cultures, different nations, different continents. These obligations have been accepted in various ways by some universities, but universities as institutions have not taken a clear and unequivocal lead in this field and have not accepted the full implications of this commitment. Few universities so far have realized the importance of their international purposes and effectively organized themselves to further them.

Knowledge is universal, but the rich contribution that students and faculty members from various cultures and backgrounds can make to the life and work of the modern university in the fields of teaching, research and service needs to be accepted as an essential and salient feature of a university's *raison d'être*. A university that does not look outward to the wider horizons of the international community is not, in the true sense of the word, a university in the second half of the twentieth century. From the cross-cultural contacts derived from such universal interchange indeed comes new self-examination and the engendering of enriched national perspectives.

The implementation of commitment to an educational exchange--of study, research and teaching in a foreign country--is thus of enormous importance today. The goals of such exchange have been variously stated as contributing to international understanding, as aiding in the process of constructive change in countries or regions undergoing rapid development, as enabling students and teachers to obtain the specialized and advanced training appropriate to their professional needs, as a means of opening the eyes of participants in such exchanges to the range of cultures and value systems in an increasingly interdependent world. Programs have been developed under national and governmental auspices; by intergovernmental agencies working through bilateral, regional or international arrangements; by private foundations; by individuals who have themselves sought and found the opportunity for the exchange experience; and, of course, by universities, many of which have engaged in the two-way process of sending some of their students abroad and at the same time providing facilities for study and research to students from foreign countries.

As stated earlier, however, the universities have a special role to play. Education must provide an understanding and appreciation of the world in which we live and of the varied ways of life found in it. Some of this can be conveyed, of course, through classroom instruction and reading, but there can be no adequate substitute for direct contact with those who belong to a different culture. Not all students can be sent abroad, but this experience should be provided in as large a measure as funds and facilities allow, for those who return influence those who cannot go. At the same time, provision must be made to

receive and make room for those qualified foreign students who apply for admission, not only because of the principle of reciprocity but because their presence at a university will itself provide something of that "contact with others" which is essential to true education. These exchanges must always be carried out through cooperation among the institutions concerned, with due regard for mutual interests.

The responsibility of the universities, however, does not stop at this point. Although all continue to have faith in the value of cross-national educational contact and exchange, it must be admitted that it does not always function as efficiently or as successfully as one would wish. Research is therefore necessary to enable us to assess the value of our exchange programs and, as a consequence, to increase their effectiveness. Much research has already been undertaken, but although it is rich in suggestions and hypothesis it has not yielded so far the guidance we need. One reason for this is that studies have almost invariably been restricted to one country or to one situation, so that generalization of the results is impossible. Another is that it has rarely if ever been associated closely enough with the ongoing activities of a university so that its findings may be translated into appropriate action.

Two therefore emerge. The first is that universities, to be worthy of the name, must become as universal as possible in their commitment by accepting a two-way flow of both students and professors between the home university and universities in other countries as a vital and planned aspect of their activities whenever possible. The second is that their commitment to the values of exchanges should be

accompanied by the determination to encourage and facilitate such research or inquiry as may be needed to give to such exchanges the maximum efficiency and success of which they are capable. The acceptance by the universities of the world of these two interlocking responsibilities will enable them to realize more fully the important intellectual goals to which they are committed and which must serve society.

STUDY ABROAD: A NEW CONCEPT

The post-World War II period in which we live has witnessed an increasing migration of student-scholars across the boundaries of old and new nations. New transportation inventions as well as substantial governmental subsidies have made possible these mass movements of young people whose major purpose is cultural understanding and the shattering of ethnocentrism. The neo-Renaissance is being prepared by these student-scholars who in their crossing of both national and disciplinary frontiers are reasserting the fundamental value of all great ages: the inexhaustible possibilities for creation of prideless and curious mind.

The elemental approach for sending students to another country in order to learn and understand that country's language and manners is gradually giving way to structured study programs whose broader aims parallel those for scholars who meet at international congresses to communicate the discoveries of their research within a community of scholars. Higher education through travel-study is no longer the privilege of one itinerant Henry Adams but of thousands of Henry Adamses. Chartres illuminates the life-experience of countless students from Kalamazoo and Walla Walla. The pilgrimages of faith to Santiago, Rome, and Jerusalem have given way to the pilgrimages of education to London, Paris, Leningrad,

Christofides, C. G., Professor and Chairman, Department of Romance Languages and Literature. Reprinted with permission from INTER/ED, Vol. 2 No. 2 a publication for the Division of International Programs, University of Washington.

and New York. The Liberal Arts which were given such a concrete synthesis on the Virgin Portal at Chartres in the twelfth century are proceeding to new syntheses based on the transmutations of the new knowledge at innumerable study centers of the world where the student-scholars live and study.

In 1970 the pressures imposed by national social programs have undermined, among other things, the financial aid that had made student travel for the purpose of study possible. My recommendation would be toward the creation of a new pattern in "study abroad" programs that would assemble serious, advanced undergraduates and graduate students in a learning experience in another country. The underlying concept would still be that of the liberal arts, but it would bring together student-scholars whose aim is cultural or scientific investigation at an advanced level, in another country. The home university would subsidize the studies of the graduate students abroad, who in turn would teach the advanced undergraduates, while simultaneously pursuing their research aims. The following model would illustrate my proposal: A cluster of twenty-five undergraduates is interested in studying French language and literature but also French history and aspects of French economic theory, art history, philosophy, genetics, and mathematics. There are seven graduate students in the university whose research would inevitably take them to Paris for doctoral research in these areas. The training of the undergraduates is turned over to these graduate students for one year, and a mini-honors college is then established in Paris (or London or Florence or Barcelona or Leningrad or Athens or Cairo or Peking) at minimal cost and inestimable educational value. A

faculty member on professional leave may (with additional compensation) be attached to the group if his research were relevant to the studies of this hypothetical model. The immense value of a seminar taught by the faculty member for both graduates and undergraduates is obvious.

III. PROGRAMS IN NEW ENGLAND
COLLEGES AND UNIVERSITIES

INSTITUTION: Albertus Magnus College, New Haven, Connecticut 06511

TITLE: Foreign Study: Junior Year Abroad

WHERE GIVEN:

WHEN OFFERED:

DATE STARTED:

DURATION: One year

AVAILABLE TO: Juniors

PREREQUISITES: Must be properly prepared juniors with the program accepted by the Dean

CREDITS: Credit given for courses that may be fitted into requirements of the college

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA: The College does not have a program of its own, but offers the possibility of the junior year in an approved program and university

INQUIRIES: Sister Thomas Aquin, Dean

INFORMATION DATE: 1968 catalog

INSTITUTION: Annhurst College, Woodstock, Connecticut 06281

TITLE: Study Abroad

WHERE GIVEN: Angers, France; Tours, France; Rome, Italy

WHEN OFFERED:

DATE STARTED:

DURATION:

AVAILABLE TO:

PREREQUISITES:

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Rutgers and Loyola University

OTHER DATA: Study Abroad Program available through group
affiliation with Rutgers and Loyola University

INQUIRIES: Sister Gertrude Emilie
Academic Vice President

INFORMATION DATE: 1968

INSTITUTION: Assumption College, Worcester, Massachusetts 01609
TITLE: Junior Year Abroad
WHERE GIVEN: Europe

WHEN OFFERED: DATE STARTED:

DURATION: One year

AVAILABLE TO: Qualified students may be authorized to spend the
junior year abroad in a European university

PREREQUISITES: Excellent academic record, competence in the
language of that country, and recommendation of
the Chairman of the student's concentration

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Paul L. Ryan, Director
Evening College and Graduate School

INSTITUTION: Assumption College, Worcester, Massachusetts 01609

TITLE: Summer Session in Paris

WHERE GIVEN: Paris

WHEN OFFERED: Every summer DATE STARTED:

DURATION: Six weeks

AVAILABLE TO: College students

PREREQUISITES: Some knowledge of the French language

CREDITS: Six credits

COSTS: \$700 tuition, living and travel expenses

AID AVAILABLE: Scholarships available

FACULTY INVOLVED: Assumption College faculty member accompanies the group

AFFILIATIONS: Cours Pratique and Cours de Civilisation at the Sorbonne

OTHER DATA:

INQUIRIES: Paul L. Ryan, Director
Evening College and Graduate School

INFORMATION DATE: 1967

49

INSTITUTION: Barrington College, Barrington, Rhode Island 02806

TITLE: Study Abroad

WHERE GIVEN:

WHEN OFFERED:

DATE STARTED:

DURATION:

AVAILABLE TO:

PREREQUISITES:

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA: Study Abroad Program Available

INQUIRIES: Paul F. Johnson
Director of Foreign Languages

INFORMATION DATE: 1968

INSTITUTION: Bates College, Lewiston, Maine 04240

TITLE: Junior Year Abroad

WHERE GIVEN:

WHEN OFFERED: DATE STARTED:

DURATION: Academic year

AVAILABLE TO: Students meeting the recommended requirements are encouraged to enroll in a foreign university

PREREQUISITES: 2.5 average for freshman year, 2.8 sophomore year, 3.0 average in major, stability of character and ability to adjust to unfamiliar surroundings

CREDITS: Full credit for the year

COSTS: Small registration fee, all other expenses depend on which university the student attends

AID AVAILABLE: Students are generally eligible for the same scholarships and grants as on the home campus

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Dr. George R. Healy
Dean of the Faculty

INSTITUTION: Bennington College, Bennington, Vermont 05201

TITLE: Junior Year in Lyons

WHERE GIVEN: Lyons, France

WHEN OFFERED: Every year DATE STARTED: 1964

DURATION: Academic year

AVAILABLE TO: Junior women

PREREQUISITES: Proficiency in French

CREDITS: Credit for full academic year

COSTS: \$2,600 tuition and rooming expenses

AID AVAILABLE:

FACULTY INVOLVED: Foreign nationals provide instruction, academic
counseling and supervision

AFFILIATIONS: University of Lyons

OTHER DATA:

INQUIRIES: Mr. Wallace P. Scott
Dean of Studies

INFORMATION DATE: 1967

INSTITUTION: Bennington College, Bennington, Vermont 05201

TITLE: Non-Resident Term Abroad, Year of Study Abroad

WHERE GIVEN:

WHEN OFFERED: DATE STARTED:

DURATION: 9 weeks (Non-Resident Term) or June of sophomore year to March of junior year

AVAILABLE TO: Any Bennington student

PREREQUISITES: Non-Resident Term Abroad with approval of student's advisor, Dean of Studies, and Director of Non-Resident Term; Year Abroad requires approval of appropriate division and the Educational Counseling Committee

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Mr. Wallace P. Scott Mrs. Helen W. Feeley, Director
Dean of Studies Non-Resident Term Office

INFORMATION DATE: 1969 catalog

INSTITUTION: Boston College, Chestnut Hill, Massachusetts 02167

TITLE: Summer School in Spain

WHERE GIVEN: Spain

WHEN OFFERED: Summer

DATE STARTED: 1962

DURATION: Eight weeks

AVAILABLE TO: Students of sophomore standing, other students
accepted

PREREQUISITES: No previous knowledge of Spanish required

CREDITS: 9 credits maximum

COSTS: \$200 for tuition and living

AID AVAILABLE:

FACULTY INVOLVED: Courses taught in Spanish by Jesuit staff of
University of Deusto

AFFILIATIONS: University of Deusto

OTHER DATA:

INQUIRIES: Meredith L. Glerklen, Director
International Office

INFORMATION DATE: 1967

INSTITUTION: Bradford Junior College, Bradford, Massachusetts 01832

TITLE: Third Year Study in Europe

WHERE GIVEN: Europe

WHEN OFFERED: DATE STARTED:

DURATION: Academic Year

AVAILABLE TO: Qualified students are encouraged to participate in carefully planned third-year programs abroad

PREREQUISITES: Language preparation, general success in chosen program

CREDITS: Students completing the third year abroad may be accepted as one-year degree candidates by the sponsoring institution

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Pine Manor

OTHER DATA: Bradford recommends the programs in Paris, Freiburg, Madrid, and Vienna administered by the Institute of European Studies; the program in Madrid administered by New York University and Mary Baldwin College; Pine Manor in Paris; University of Stockholm and the college transfer program of The Academic Year Abroad

INQUIRIES: William Thrasher
Foreign Student Advisor

INSTITUTION: Brandeis University, Waltham, Massachusetts 02154

TITLE: Jacob Hiatt Institute in Israel

WHERE GIVEN: Israel

WHEN OFFERED: Every year DATE STARTED: 1961

DURATION: 6 months - summer following sophomore year and fall semester of junior year

AVAILABLE TO: Juniors and seniors, (students from other colleges may participate)

PREREQUISITES: B average, 2 years of college work and appropriate introductory courses in the social sciences

CREDITS: 16 hours of credit given when successfully completed

COSTS: \$1,825 includes tuition, fees, round trip, travel, room and board (not including lunch)

AID AVAILABLE: Some financial aid given by Brandeis University to those qualified, usually a scholarship-loan combination on the basis of financial need and academic qualifications

FACULTY INVOLVED: Courses in the Hiatt Institute are taught by members of the Brandeis faculty, assisted by visiting lecturers from the Hebrew University in Jerusalem

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Dr. Harrison Hoblitzelle
Director of International Programs

INSTITUTION: Brandeis University, Waltham, Massachusetts 02154
TITLE: Junior Year Abroad
WHERE GIVEN: Europe, India, Israel, Colombia
WHEN OFFERED: Every year DATE STARTED:
DURATION: Academic year
AVAILABLE TO: Any qualified Brandeis student wishing to participate
in an accredited educational program
PREREQUISITES:

CREDITS: Credit toward Brandeis degree

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Dr. Harrison Hoblitzelle, Director
Office of International Programs

INFORMATION DATE: 1969

INSTITUTION: Brown University, Providence, Rhode Island 02912

TITLE: Junior Year Abroad, Summer Session, Independent Study

WHERE GIVEN:

WHEN OFFERED: DATE STARTED:

DURATION: One year, summer

AVAILABLE TO: Qualified juniors

PREREQUISITES: 3.0 average for the first 3 semesters, 4 semester courses of language beyond the 3rd level course, program must be approved by the Committee on Academic Standing, instruction must be offered in the language of the country student chooses to attend

CREDITS: No more than 4 concentration course credits given

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA: Students may join one of the groups recognized by the Council on the Junior Year Abroad of the Institute of International Education, participate during the summer in certain recognized summer sessions or apply for independent study

INQUIRIES: Dr. Gordon R. Dewart
Associate Dean of The College

INSTITUTION: Castleton State College, Castleton, Vermont 05735

TITLE: Study Abroad: Independent Study

WHERE GIVEN:

WHEN OFFERED: DATE STARTED:

DURATION:

AVAILABLE TO: Students who desire to participate in an established program or study independently abroad

PREREQUISITES: Program must be approved by the Dean of the Faculty and the Faculty Committee on the Curriculum

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS:

OTHER DATA:

INQUIRIES: Dr. H. Franklin Irwin, Jr.
Dean of the Faculty

INQUIRIES: Carol M. Lippia, Coordinator
International Study Program

INFORMATION DATE: 1968

INSTITUTION: Clark University, Worcester, Massachusetts 01610

TITLE: Junior Year Abroad

WHERE GIVEN:

WHEN OFFERED: Each year DATE STARTED:

DURATION: All or a portion of junior year

AVAILABLE TO: All qualified sophomores

PREREQUISITES: Program must be approved

CREDITS: Credit depends on prior approval of the College Board

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Experiment in International Living, Putney, Vermont
The Institute For European Studies
Jacob Hiatt Institute in Israel

OTHER DATA: In cooperation with organizations and American colleges and universities, Clark offers its students the opportunity of spending the junior year abroad

INQUIRIES: Mr. J. Fannin King
Associate Professor of Romance Languages

INFORMATION DATE: 1969-70 catalog

INSTITUTION: Colby College, Waterville, Maine 04901

TITLE: Junior Year Abroad, Independent Study

WHERE GIVEN:

WHEN OFFERED: Each year DATE STARTED:

DURATION: One year

AVAILABLE TO: Any student who arranges details with major advisor
may apply

PREREQUISITES: Approval presupposes an academic record for the
first three semesters high enough to give promise
that the student will complete the program with
credit to himself and the college

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Sweet Briar, Hamilton, and Smith

OTHER DATA: To participate in independent study, student must
apply immediately after mid-year exams of sophomore
year

INQUIRIES: Prof. Henry Holland
Chemistry Faculty Committee on Foreign Students
& Foreign Study

INFORMATION DATE: 1968 catalog

INSTITUTION: Colby College, Waterville, Maine 04901

TITLE: Summer Institute in Israel

WHERE GIVEN: Israel

WHEN OFFERED: DATE STARTED:

DURATION: July and August, (seven weeks)

AVAILABLE TO:

PREREQUISITES:

CREDITS:

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: University of Israel

OTHER DATA: A course in International Law and International Politics

INQUIRIES: Prof. Guenter Weissbory, Director

TITLE: Junior Year Abroad

WHERE GIVEN:

WHEN OFFERED: DATE STARTED:

DURATION: One full year, beginning with the fall semester

AVAILABLE TO: Limited number of students who give promise in their first two years that they will make good use of the advantages of study in another culture

PREREQUISITES: Approval of the Faculty Committee on the Junior Year Abroad, acceptance of the proposed plan by the major advisor and the Dean, 3.0 average for the first 2 years

CREDITS: Full credit received

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Institute of European Studies

OTHER DATA: Approval is granted for study at a number of European universities

INQUIRIES: Mr. John D. O'Connell, Chairman
Faculty Committee on Junior Year Abroad

INFORMATION DATE: 1969-70 catalog

INSTITUTION: Connecticut College, New London, Connecticut 06320

TITLE: Junior Year Abroad, Independent Study

WHERE GIVEN:

WHEN OFFERED: Every year DATE STARTED:

DURATION: One year or one semester

AVAILABLE TO: Students who have completed 3 semesters

PREREQUISITES: Junior Year Abroad - 2.75 average, 3.0 in major for
3 semesters, adequate language facility
Independent Study - 3.1 average for 3 semesters
(must be maintained 4th semester), value of program
must be proved

CREDITS: Credit with approval in advance of the College

COSTS:

AID AVAILABLE:

FACULTY INVOLVED:

AFFILIATIONS: Sweet Briar, Smith

OTHER DATA: College does not sponsor any program for study abroad
but encourages students to participate in the already
established programs such as those of Sweet Briar and
Smith College

INQUIRIES: Mr. Pierre Deguise, Chairman
Committee on Study Abroad

INFORMATION DATE: September 1969

INSTITUTION: Dartmouth College, Hanover, New Hampshire 03755

TITLE: Foreign Language Program

WHERE GIVEN: San Jose, Costa Rica; Bourges, France

WHEN OFFERED: Every year DATE STARTED:

DURATION: One term

AVAILABLE TO: All students who would normally complete the language requirement by taking 1, 2, or 3 language courses during the freshman year

PREREQUISITES: Must take a semester of intensive language training for one credit and live in a Dartmouth Foreign Language Dorm

CREDITS:

COSTS: About \$200 more than the regular cost for one term

AID AVAILABLE: Loans and scholarships are available

FACULTY INVOLVED: One senior advisor and one faculty member

AFFILIATIONS:

OTHER DATA: Student spends one term living with a family and studying the language and culture at a Dartmouth center in France or Costa Rica

INQUIRIES: Dr. John A. Rassias, Chairman
Committee on Language Instruction and Study Abroad

INSTITUTION: Dartmouth College, Hanover, New Hampshire 03755

TITLE: Foreign Study Program

WHERE GIVEN: Europe, Costa Rica, Peru, Russia, Senegal

WHEN OFFERED: Every year DATE STARTED: 1958

DURATION: One term

AVAILABLE TO: Only Dartmouth sophomores, juniors and seniors
majoring in any department

PREREQUISITES: Two or three courses beyond the elementary level
in a foreign language, participation in the
Intensive Language Training course, C+ minimum
average

CREDITS: Full term credit

COSTS: About \$200 above the cost of a term at Dartmouth

AID AVAILABLE: Scholarships and loans

FACULTY INVOLVED: One faculty member and one senior adviser at
each study center

AFFILIATIONS: Universities of Freiburg, Salamanca, San Marias,
Mainz, Lyons, Caen, Montpellier, Pau, Toulouse,
Bourges, Florence, Strasbourg, Lima, Taiwan, Senegal,
and South Africa
